

Top 10 Reasons

to Get Your Hearing Aids from Physicians Hearing Services

PHYSICIANS
HEARING SERVICES

At Physicians Hearing Services (PHS), we believe that you deserve the best in medical care, not just for your hearing health but for your whole body. Untreated hearing loss can lead to additional health complications such as cognitive decline, falls, depression, anxiety, among others. Hearing health is an essential part of your general health, which is why and how we make it our mission to do more than just ‘aid’ your hearing.

-  **Caring:** PHS is committed to welcoming all who enter our door with professional service, integrity and a smile. We work as a team to go the extra mile to solve the issue and compassionately tend to the full spectrum of your continuum of care.
-  **Competence:** With all of the hearing healthcare options today, it can be confusing where you should turn. Our doctors of audiology are medically trained to treat your hearing loss and rule out any health conditions that might be affecting your hearing health.
-  **Credentials:** At PHS, you can expect experienced audiologists—with doctorate degrees who are licensed and board-certified. Our audiologists hold advanced degrees and are held to a high professional standard, offering our patients the same standards and level of care.
-  **Experience:** Hearing loss is unique to each person and affects people of all ages, from pediatric to adult. Our doctors of audiology are experts in all aspects of hearing health care for every age; this includes diagnostic audiological testing, hearing device fitting, along with aural rehabilitation and counseling.
-  **Service:** PHS offers a medically-based, holistic healthcare model, which thoroughly addresses your hearing loss and its cause. Together, we will tailor a customized treatment that takes your complete health profile into account, not just your hearing needs.
-  **Convenience:** Your time is important. We are open Monday through Friday and offer appointment times to accommodate your busy schedule. Our office is conveniently located in North Fresno near 41 and Herndon.
-  **Trust:** We have been providing quality service and care to the San Joaquin Valley community since 1966. Our goal is to better the community through communication and help reconnect our patients to the world of sound.
-  **Technology:** Choose from the latest hearing device technology from the industry’s leading manufacturers, equipped with cutting-edge advancements such as background noise management and wireless capabilities. We offer an array of hearing device options to fit your level of hearing loss, your lifestyle and budget, with several financing options to help reduce the financial barrier that might prohibit you from taking control of your hearing loss.
-  **Dedication:** PHS is fully invested in your long-term hearing health. We take the time to explain every part of the process from testing and fitting, to counseling and follow-ups until you are satisfied. We will be by your side throughout your hearing healthcare journey.
